

MASTER TELA de Polyester / 7mil.

Product Description

Master Tela is a symmetrically made by two times coating on the front with 150 denier Polyester cloth.

Applications and Characteristics

- The product is very well suitable for Indoor and Outdoor-applications.
- For optimal Outdoor-applications the film must be printed with pigmented inks.
- Outdoor tests in Bern with the pigment inks showed a weather-resistance of 3 months.
- Main usages are normal placard for dam720.
- Due to competitive prc. It used for indoor display and flag.

Coating Surface

Gloss Level :Matte

Caliper : 25 microns (±10%)

Substance : 20 gsm (±10%)

Base coating

Gloss Level : Matte

Caliper : 10 microns (±10%)

Substance : 10 gsm (±10%)

Face Material

Material : Polyester 150 Denier Cloth

Caliper : 135 microns (±10%)

Substance : 93 gsm (±10%)

Adhesive

Non-Adhesive

Release Liner
